

Real Ice Cream, Real Easy.

Riva

Join the Rivalution

Imagine if you could...

...increase profit, improve productivity and hygiene, reduce labour, lower service and maintenance costs and deliver a great taste sensation that will bring your customers back for more...

Imagine no longer - The Rivalution is here.

Real Profit...Easy!

Serve traditional, high quality ice cream, real easy. Reduce labour, waste, service and maintenance costs and lower your energy costs.

Real Productivity...Easy!

With only 4 parts to clean, your staff will be done in less than 3 minutes and working on more important things.

Real Quality Control...Easy!

The Riva system dispenses pre-frozen, real ice cream (yes! Real ice cream not soft serve!) So you can confidently expect the same smooth result every time – even during your peak periods.

Real Hygiene...Easy!

It's so easy to keep the Riva system clean and safe and the single-use, sealed container system means no messy on-site mixing. Product integrity is protected by HACCP accredited systems, from manufacturing right to your freezer door. It's just one less thing to worry about.

Real Choice...Easy!

Research shows that vanilla remains the most popular ice cream flavour around the world, closely followed by chocolate. That's why we've kept it simple and give you a choice of the two. You can even offer them simultaneously with our double dispenser model.

Real Satisfaction...Easy!

Your customers will love the taste of rich, dairy-made ice cream and your staff will be grateful that the Riva system is just so easy!

Riva - Real Ice Cream, Real Easy.
